

HAD ENOUGH OF THIS?

- **Whenever possible put your trash out before 7.00 a.m. on Tuesday and Friday mornings (not the night before). This will minimize trash scavenging and rodent feeding (rats eat at night!)**
- **Please do not put trash out the night before when it snows, since it gets buried and will not be seen by the trash crews**
- **Place trash in a sturdy bag. Do not use small plastic and paper bags from market or convenience stores**
- **Use thick clear plastic bags (15-30 gallons in size) for recycling and separate out 5 cents bottles and cans to minimize trash picking and spillage**
- **If you missed trash collection, please bring it in**
- **Report issues to BOS:311**
